André B. Lalonde MD, FRCSC, FRCOG
University of Ottawa and McGill University, Ottawa, Canada

Christopher B-Lynch FRCS, FRCOG, D.Univ
Milton Keynes General Hospital NHS Foundation Trust (Oxford Deanery), UK

Published on behalf of

The Global Library of Women’s Medicine
(www.glowm.com)

by

Sapiens Publishing

This book has been produced and published on a not-for-profit, charitable basis by the Founders of The Global Library of Women’s Medicine (and of Sapiens Publishing) in loving memory of their daughter ABIGAIL BLOOMER, who worked alongside them in medical publishing for a number of years and who sadly died at the early age of 31 from breast cancer in December 2001. Abigail was especially involved in publishing on women’s health issues. She is greatly missed.

Whilst this book is being made available via the normal publishing channels in the Western World, it will be supplied free to selected physicians in less-resourced countries. It is also being made available universally free, and in full, on the website of The Global Library of Women’s Medicine (www.glowm.com).

A wall chart on this topic, designed to inform and support birth assistants, is also being made available.
## Contents

The Editors .......................... ix  
The Contributors ....................... xi  
Foreword ................................. xix  
G. Serour and A. B. Lalonde ................. xxi  
Editors’ Preface .......................... xxii  
Sir S. Arulkumaran, M. Karoshi, L. G. Keith, A. B. Lalonde and C. B-Lynch

### Section 1: Essential ‘Must Read’ Chapters

1. Managing the Ten Most Common Life-Threatening Scenarios Associated with Postpartum Hemorrhage  
   M. Karoshi, J. M. Palacios-Jaraquemada and L. G. Keith  
2. Uterovaginal Blood Supply: the S1 and S2 Segmental Concepts and their Clinical Relevance  
   J. M. Palacios-Jaraquemada, M. Karoshi and L. G. Keith  
3. Management of Exsanguinating Patients in Trauma: a Model for Postpartum Hemorrhage  
   J. B. Elterman, G. M. Riha and M. A. Schreiber  
4. Transfusion Management of Obstetric Hemorrhage  
   E. Lockhart  
5. Early Use of Fibrinogen in the Treatment of Postpartum Hemorrhage  
   O. Onwumene, D. Green and L. G. Keith  
6. New Approaches to Transfusion Therapy for Postpartum Hemorrhage  
   M. J. Paidas

### Section 2: Introduction

7. Is Postpartum Hemorrhage a Legacy of our Evolutionary Past?  
   E. T. Abrams and J. N. Rutherford  
8. Postpartum Hemorrhage Today: Living in the Shadow of the Taj Mahal  
   A. B. Lalonde, J. Liljestrand, H. Rushwan and P. Okong  
   A. B. Roston, A. L. Roston and A. Patel  
10. Assessing and Replenishing Lost Volume  
    J. G. L. Cockings and C. S. Waldmann  
11. Pitfalls in Assessing Blood Loss and Decision to Transfer  
    B. S. Kodkany, R. J. Derman and N. L. Sloan  
    G. Urban, H. Valensise, E. Ferrazzi, P. Beretta, P. Tortoli, L. Bonsignore, S. Ricci, P. Vergani,  
    P. Patrizio and M. J. Paidas

Index 621
The Editors

Sir Sabaratnam Arulkumaran, MD, PhD, FRCS, FRCOG
Professor and Head of Obstetrics and Gynaecology
St George’s, University of London, UK

Mahentesh Karoshi, MD, MRCOG, DCRCM
Consultant Obstetrician and Gynaecologist
Department of Obstetrics and Gynaecology
Barnet and Chase Farm Hospitals NHS Trust
Barnet, London, UK

Louis G. Keith, MD, PhD, ScD (Hon), FACOG, FR.COG
Professor Emeritus
Department of Obstetrics and Gynecology
Northwestern University
Former Head, Section of Undergraduate Education and Medical Student Affairs, Chicago, IL, USA

André B. Lalonde, MD, FR.CSC, FR.COG
Professor of Obstetrics and Gynaecology
University of Ottawa and McGill University
Ottawa, Canada

Christopher B-Lynch, MBBS, LRCP, FR.CS, FR.COG, MAE, D.Univ, MCIArb QDR
Consultant Obstetrician and Gynaecological Surgeon
Professor (visiting) Cranfield University (Health Faculty); Consultant Emeritus
Milton Keynes General Hospital NHS Foundation Trust (Oxford Deanery), Milton Keynes, UK
Publishers’ Acknowledgments

The Publishers would like to express their sincere thanks to all the Editors and Contributors for their kindness in providing their contributions to this textbook without any remuneration or royalty. It is their generosity that has made this publication possible.

We should also like to express particular thanks to Professor Louis Keith who assumed the primary responsibility for reading and reviewing all the chapters of the book at the both manuscript and proofing stages; his contribution has been a notable one.

In addition to this printed edition, this book is also available free online on the website of The Global Library of Women’s Medicine (www.glowm.com) – and in this version it also incorporates a number of video clips that serve to illustrate and amplify certain elements of the text.
A. Coker, MBBS, MRCOG
Consultant Obstetrician and Gynaecologist
Queen’s Hospital
Romford, Essex, UK

D. Cordovani, MD
Obstetric Anesthesia Fellow
Mount Sinai Hospital
University of Toronto
Toronto, Ontario, Canada

R. Dabash, MPH
Director
Gynuity Health Projects
New York, NY, USA

K. J. Dalton, LLM, PhD, FRCOG, FCLM, DFMS
Department of Obstetrics and Gynaecology
University of Cambridge
Cambridge, UK

D. Danso, MBBS, MRCOG
Milton Keynes General Hospital NHS Foundation Trust
(Oxford Deanery)
Milton Keynes, Bucks, UK

A. E. Dastur, MD, FICOG, FCPS, DGO, DFP, FICMU, ATMF(USA)
Honorary Professor Emeritus and Dean
Seth G S Medical College
and Nowrosjee Wadia Maternity Hospital
Mumbai, India

N. A. Dastur, MD, FICOG, DGO, DFP
Honorary Obstetrician and Gynaecologist
Grant Medical College
Seth G S Medical College
and Nowrosjee Wadia Maternity Hospital
Mumbai, India

S. De Carolis, MD
Research Fellow
Department of Obstetrics and Gynaecology
Catholic University of the Sacred Heart
Rome, Italy

J. Dela Merced, MD
Attending Physician
White Memorial Medical Center
Los Angeles, CA, USA

R. J. Derman, MD, MPH, FACOG
Chair, Department of Obstetrics and Gynecology
Christiania Care Health Systems
Director, Center for Women’s and Children’s Health Research
Christiania Care Health Systems
Newark, DE;
Professor, Obstetrics and Gynecology
Thomas Jefferson University
Philadelphia, PA, USA

G. A. Dildy, III, MD
Professor of Obstetrics and Gynecology
Director of Obstetrics and Gynecology Quality and Patient Safety
Vice Chair of Clinical Affairs
Baylor College of Medicine
Houston, TX, USA

A. Duncan, MBBS, BSc, FRCS, FRCSE, FRCOG
Consultant Gynaecological Surgeon
Northampton General Hospital
Northampton, Northamptonshire, UK
The Contributors

I. Dzuba, MHS
Program Associate
Gynuity Health Projects
New York, NY, USA

G. S. Eglinton, MD
Associate Professor, Obstetrics and Gynecology
Weill Medical College of Cornell University
Chairman, Department of Obstetrics and Gynecology
New York Hospital Medical Center of Queens
Flushing, NY, USA

E. El Hamamy, MBChB, MSc, FRCOG, MRCPI
Consultant Obstetrician and Gynaecologist
Nevill Hall Hospital
Abergavenny, Monmouthshire, Wales, UK

H. El-Refaey, MD, MRCOG
Consultant and Honorary Senior Lecturer
Imperial College School of Medicine
Department of Academic Obstetrics and Gynaecology
Chelsea and Westminster Hospital
London, UK

J. B. Elterman, MD
Oregon Health and Science University
Portland, OR, USA

S. Engelbrecht, CNM, MPH, MSN
Consultant for International Medicine
Kenmore, WA, USA

E. Evans, FRCA
Consultant Anaesthetist
St George’s Healthcare NHS Trust
London, UK

D. Farine, MD, FRCSC
Professor of Obstetrics and Gynecology
Head of the Division of Maternal/Fetal Medicine
Mount Sinai Hospital, University of Toronto
Toronto, ON, Canada

M. M. F. Fathalla, MB, ChB(Hons), MD, MRCOG
Associate Professor of Obstetrics and Gynecology
Department of Obstetrics and Gynecology
Faculty of Medicine
Assiut University Women’s Health Hospital
Assiut, Egypt

S. Ferrazzani, MD
Associate Professor of Medicine and Prenatal Age
Department of Obstetrics and Gynecology
Catholic University of the Sacred Heart
Ospedale Cristo Re
Rome, Italy

E. Ferrazzi
Professor and Chairman of Obstetrics and Gynecology
University of Milan
V. Buzzi Children Hospital
Milan, Italy

D. Fleming, MD, MRCOG
Consultant
Department of Obstetrics and Gynaecology
Kingston Hospitals NHS Trust
Kingston Upon Thames, UK

R. V. Ganchev, MBChB, MRCP
Associate Specialist in Haematology
Department of Clinical and Laboratory Haematology
Royal Infirmary of Edinburgh
Edinburgh, Scotland, UK

R. Gangopadhyay, MBBS, DFFP, MRCOG
Department of Obstetrics and Gynaecology
Barnet General Hospital
Barnet, London, UK

M. Geary, MD, FRCOG, FRCPI, DCH
Consultant Obstetrician Gynaecologist
Royal College of Surgeons in Ireland
Rotunda Hospital
Dublin, Ireland

S. E. Geller, PhD
G. William Arends Professor of Obstetrics and Gynecology
Director, Center for Research on Women and Gender
Director, National Center of Excellence in Women’s Health
College of Medicine
University of Illinois, Chicago
Chicago, IL, USA

C. Georgiou, BSc, PhD, MBBS, MRCOG, FRANZCOG
Consultant Obstetrician and Gynaecologist (Wollongong Hospital)
Associate Professor Obstetrics and Gynecology
Illawarra Health and Medical Research Institute; Academic Lead in Obstetrics and Gynecology
Graduate School of Medicine
University of Wollongong
Wollongong Hospital Academic Unit
Wollongong, NSW, Australia

F. Goffinet, MD, PhD
Maternité Port-Royal
Hôpital Cochin-Saint-Vincent-de-Paul
Université Paris Descartes
Paris, France

S. S. Goudar, MD, MHPE
Professor
Department of Physiology
J. N. Medical College
Belgaum, Karnataka, India

G. Grangé
Maternité Port-Royal
Hôpital Cochin-Saint-Vincent-de-Paul
Université Paris Descartes
Paris, France

D. Green, MD, PhD
Division of Hematology Oncology
Feinberg School of Medicine
Northwestern University
Chicago IL, USA

K. Groom, MBBS, BSc, PhD, FRANZCOG
Senior Lecturer
Department of Obstetrics and Gynaecology
University of Auckland
New Zealand

A. Hadar, MD
Department of Obstetrics and Gynecology
Faculty of Health Sciences
Ben Gurion University of the Negev
Soroka University Medical Center
Be’er-Sheva, Israel

K. Hayes, MRCOG
Consultant in Obstetrics and Gynaecology
St George’s Hospital
London, UK
R. Hebballi, MD, FRCA, FCARCSI, FFICM
Consultant in Anaesthesia and Critical Care Medicine
Glenfield Hospital
University Hospitals of Leicester NHS Trust
Leicester, UK

A. Hemmerling, MD, PhD, MPH
Project Director
UCSF Bixby Center for Global Reproductive Health
Department of Obstetrics, Gynecology and Reproductive Sciences
San Francisco, CA, USA

C. E. Henderson, MPH
Bixby Center for Population, Health and Sustainability
School of Public Health
University of California, Berkeley
Berkeley, CA, USA

P. Hensleigh, MD, PhD (deceased)
Professor Emeritus
Department of Obstetrics and Gynecology
Stanford University
Stanford, CA, USA

T. Ikeda, MD, PhD
Director, Department of Perinatology and Gynecology
National Cerebral and Cardiovascular Center
Osaka, Japan

Y. Imaizumi, Dr of Science
Invited Professor, Department of Health Sciences
Graduate School of Medicine
Osaka University
Osaka, Japan

T. Z. Jacobson, MA, MBBS, FR.COG, FRANZCOG
Staff Specialist
Department of Obstetrics and Gynaecology
Mater Mother’s Hospital
Brisbane, Queensland;
Senior Lecturer, University of Queensland, Australia

S. Kapoor, FRCA
Queen’s Hospital
Romford, Essex, UK

C. Kapungu, PhD
Assistant Professor in Obstetrics and Gynecology
Center for Research on Women and Gender
University of Illinois at Chicago
Chicago, IL, USA

M. Karoshi, MD, MR.COG, DCR.CM
Consultant Obstetrician and Gynaecologist
Department of Obstetrics and Gynaecology
Barnet and Chase Farm Hospitals NHS Trust
Barnet, London, UK

G. Kayem, MD
Service de Gynécologie-Obstétrique
CHI Créteil
Université Paris XII Henri Mondor
Paris, France

L. G. Keith, MD, PhD, ScD (Hon), FACOG, FR.COG
Professor Emeritus
Department of Obstetrics and Gynecology
Northwestern University
Former Head, Section of Undergraduate Education and Medical Student Affairs
Chicago, IL, USA

FOREWORD: a FIGO Perspective

The second edition of *A Comprehensive Textbook of Postpartum Hemorrhage* will be launched during the International Federation of Gynecology and Obstetrics (FIGO) World Congress in Rome, Italy in October 2012. For FIGO, this marks another important step in the battle to improve maternal health and to decrease maternal mortality.

The international efforts spearheaded by FIGO and UN agencies to reduce maternal mortality have shown positive results in recent years. Studies in 2010, 2011 and 2012 have reported important decreases in maternal mortality worldwide. However, as these estimates are based on mathematical models and many countries still have poor programs related to vital statistics, these reductions must be appraised cautiously.

In spite of the uncertainty regarding exact numbers, no controversy exists about the need for prevention and treatment of postpartum hemorrhage (PPH). Although recent evidence suggests there is a decline in maternal mortality worldwide, a simultaneous increase in the proportion of maternal deaths due to PPH in Latin America, Africa and South East Asia has been noted. Whereas many countries have made progress, others have stagnated, and a few actually show an increase in maternal mortality. In some countries, maternal mortality is the cause of over 50% of maternal deaths, with Guatemala and Afghanistan serving as prime examples.

The original chapters in this book continue to address issues of vital statistic definitions, accurate measurements of blood loss, hospital management and use of new medications to stem the tremendous burden of PPH. In the revised and new chapters, discussion on the increase in incidence of PPH and maternal mortality due to placenta previa and placenta accreta, most probably due to the higher numbers of cesarean sections in the past 5–10 years worldwide is presented.

The balloon internal uterine tamponade, both as a diagnostic test and as a treatment, is expanded in a number of chapters. Because it would be difficult if not unethical to conduct a randomized control trial on tamponade use or many other therapies for PPH, clinical practice and a registry would go a long way towards establishing this as a true advance in the treatment of severe PPH.

The update on the Prevention of PPH Initiative (POPPHI) project has shown the positive impact of active management of the third stage of labor, so much so that both FIGO and WHO now recommend this as a routine for all women birthing throughout the world. Further presentations are provided on the use of misoprostol for either prevention or treatment in the absence of other available uterotonic medications. Coagulation disorders are discussed, as well as the use of recombinant factor VIIa and the use of carbetocin for the prevention of PPH at cesarean section.

Many chapters discuss the importance of timing in the diagnosis and early treatment of PPH from the community to the referral level. Examples include discussion on misoprostol use by traditional birth attendants under supervision of a trained birth attendant and the non-pneumatic anti-shock garment (NASG). This technique appears to be lifesaving and continues to be utilized and clinically evaluated throughout the world where women are suffering massive PPH, are in shock and where immediate treatment is not available.

In several chapters the relatively recent recognition that the ratio of fibrinogen : red blood cells : plasma and the timing of their administration has an important effect on enhancing survival is discussed. This information, obtained from military and trauma surgical registers, will be new to many readers, as will the need to use protocols when massive blood transfusion is being administered.

FIGO began its PPH prevention and treatment campaign in 2003. We have made significant progress, but are still faced with serious challenges in order for health care professionals to be trained under one system with available medications at all times and with a system of referral from the community to the first referral hospital. It is not only important to have training programs in place, but also the implementation of training is now the challenge facing health care professionals and birth attendants throughout the...
world. Countries which have been successful are those countries with a system in place that ensures that medication is available at all times in all birthing units.

PPH continues to threaten women’s lives in low and high resource countries and is the most important cause of maternal mortality in low resource countries. The majority of cases of PPH are due to uterine atony where the treatment is well known but needs to be institutionalized all over the world. It is not well understood that in high-risk situations we can reduce risk significantly by having a continuous training evaluation of near misses and maternal deaths and by using simple low-cost technology such as tamponade or the NASG garment.

FIGO and International Confederation of Midwives (ICM) have supported the training and implementation of active management of the third stage of labor. Now is the time for all countries to embrace the FIGO and WHO guidelines on PPH and make these guidelines available in all of the birthing units in our respective countries. We have proposed wall charts for all birthing units in the PPH guideline chapter. Until we systematically address this issue, PPH will continue to be a death threat to many women in the world.

In closing, we would like to thank Mr David Bloomer and his wife Paula who, as publishers of this volume and The Global Library of Women’s Medicine (GLOWM), provide unconditional support to make this book available throughout the world in many languages.

Editors’ Preface

The first edition of *A Textbook of Postpartum Hemorrhage* was launched with fanfare on October 11, 2006 by HRH the Princess Royal at Chandos House, The Royal Society of Medicine, London. The four editors and Mr David Bloomer, the book’s publisher who, along with his wife Paula supported its publication, could not have anticipated its enthusiastic reception by the medical profession throughout the world. In all, more than 15,000 copies of this volume were distributed free of charge to doctors practicing obstetrics and gynecology in the most diverse locations and under the most varied circumstances. In addition, the book was widely accessed, and individual chapters downloaded, via the website of *The Global Library of Women’s Medicine* (www.glowm.com). Of equal importance, when the editors embarked on a series of postgraduate courses in the UK, Egypt, Ukraine, India, Malaysia and China, among others, practitioners invariably voiced their thankfulness for having the book in their hands, noting over and over how their use of it has saved a patient’s life.

Of course, it had been our hope and fervent desire that the efforts that we made to prepare the first edition would do just that, i.e. save women’s lives and reduce the scandalous loss of maternal life due to postpartum hemorrhage (PPH). In this regard, we were more than compensated for our efforts, but it soon became obvious that a second edition was necessary. Many things had changed since 2005 when we began planning the first edition, not least of which was an important re-evaluation of the most useful methodology to provide massive transfusion and a far clearer understanding of the uterine anatomy as it pertains to the blood vessels of that organ. This latter subject was under-represented in the first edition, and the former was unknown at the time of its writing.

As was the case in the first edition, the complete book is universally available entirely free on the website of *The Global Library of Women’s Medicine*. Once again, neither authors nor editors have received compensation for their time and contribution. Many of the original chapters have been revised and updated, whilst new chapters cover a range of additional topics including the uterine anatomy, the recent changes in transfusion practices, difficulties presented by adherent placentas, intrauterine balloon therapy and the active management of the third stage of labor. Where appropriate, links to video clips are provided.

The editors wish to thank Professor Sir Subaratnam Arulkumaran for joining the editorial team in the position of Senior Editor and for his many insights into the global perspectives of PPH at a time when he is about to become President Elect of FIGO. They also wish to thank Professor Louis Keith for his careful editorial expertise in reviewing each chapter at both the manuscript and the page proof stages. Thanks also are extended to Dorothy Walmsley who served as desk editor for the publication and to Julia Tissington who acted as project manager. Finally, but by no means last in terms of the importance of their contributions, immense gratitude is due to Paula and David Bloomer, founders of *The Global Library of Women’s Medicine* (and also of Sapiens Publishing). As was the case with the first edition, this book is produced in grateful and loving memory of their daughter, Abigail Bloomer, who sadly died at the early age of 31 from that other scourge of women, breast cancer, in December 2001.
