

## Evaluation Form for Emerging Infections Lecture

### Pre lecture/workshop questionnaire

1. What is your level of training?

Resident : EM: IM:. Surgery Other (specify) Medical Student : 1 2 3 4

PA

PA-S

Other: Specify

2. What is your specialty or subspecialty of interest (e.g. infectious disease, disaster medicine, medical education, administration)?

Specify if other

3. Is your knowledge of outbreak *detection and reporting*:

Excellent Good Fair Poor None

4. Is your knowledge of outbreak *containment*:

Excellent Good Fair Poor None

5. I feel it is important for clinicians in general to be able to detect and report contagious disease outbreaks

Very important Somewhat important Minimally important Not important at all

Comments:

6. I feel it is important for clinicians to be able to apply basic outbreak containment practices

Very important Somewhat important Minimally important Not important at all

7. How important do you feel this material is to your chosen field of practice?

Indispensable Important Somewhat important Minimally important Not important

**Post lecture/workshop evaluation**

1. Did you participate in the pre-lecture workshop?

Yes                  No

2. If you participated in the workshop, how beneficial do you think the workshop was to you?

Very                  Somewhat                  Slightly                  Not at all

3. How helpful was the lecture to you?

Very                  Somewhat                  Slightly                  Not at all

4. How comfortable are you with outbreak detection and reporting?

Very                  Somewhat                  Slightly                  Not comfortable

5. How comfortable are you with outbreak containment and hospital response plans?

Very                  Somewhat                  Slightly                  Not comfortable

6. If there was a contagious outbreak tomorrow, I would feel \_\_\_\_\_ confident in my role and responsibilities

Very                  Somewhat                  Slightly                  Not at all

7. This educational experience has given me tools I feel will assist me in the event of a contagious outbreak

Yes                  No

8. Will this experience lead to changes in the way you care for patients?

Yes                  No

If so, describe how:

9. How important do you feel this material is to your chosen field of practice?

Indispensable    Important    Somewhat important    Minimally important    Not important

Why or why not?

10. I would like to see more lectures on this topic or other topics in emerging infections in our curriculum

Yes

No

11. Topics I would be most interested in:

1. Drug Resistance

2. VRE/MRSA

3. Postexposure Prophylaxis/  
Occupational Exposures

4. Tropical Diseases

5. Bioterrorism agents

6. Biodefense Planning/  
Public Health Preparedness

7. Empiric antibiotics

8. Skin and soft tissue infections

9. HIV-related opportunistic infections

10. The immunocompromised host

11. Fever and rash

12. The returned traveler

12. Rate the lecture, on a scale of 1 to 5 (1 being poor, 5 excellent)

Organization of material                      1 2 3 4 5

Relevance of material to topics            1 2 3 4 5

Style of presentation                        1 2 3 4 5

Format for lecture                            1 2 3 4 5

Audiovisual Aids                            1 2 3 4 5

Overall Quality                                1 2 3 4 5

13. I feel this topic is adequately addressed in other areas of the curriculum (if so, where)

Yes No

14. Things I liked about the lecture:

Suggestions for improvement:

Additional Comments:
