

## REVIEWERS

Completing a task such as this is only possible with the help of those who shared their knowledge by reading and making many excellent suggestions:

- *General/ Colo-rectal*: Ian Asimwe, Mhairi Collie, Brian Hancock, Geert Morren and Mike Thompson.
- *Gynecology*: Andrew Browning, Paul Hilton, Rachel Pope and Jeff Wilkinson.
- *Plastics*: Rodger Brown.
- *Urology*: Steven Arrowsmith, Mike Ingber and John Lemberger.
- Former trainees and residents who took time to read and correct the manual at various stages: Paul Ballard, Pauline Borsboom, Chisomo Chalamanda, Mike Ehlert, Tagie G-Mansaray, Rowan Gundry, Ruth Hadebe, Kari Hacker, Debbie Karp, Paolo Parimbelli, Esther Scheers and Julie Solomon.

## ACKNOWLEDGEMENTS

To those who I had the privilege of spending time with and who took the time to pass on their knowledge of fistula surgery:

- To Kees Waaldijk who has done much to improve our understanding and knowledge of obstetric trauma and is a great inspiration to the fistula world. One of his mottos is: “Write it down otherwise your knowledge will die with you”.
- To Dr Ambye and Tom Raassen who have shared their skills with many fistula surgeons.
- To the team in Addis Ababa Fistula hospital where many of us did our first fistula cases. Started by Drs Hamlin and now continued by Dr Fekede.
- To the team in Kitovu hospital, Uganda which has been a great centre for sharing knowledge about obstetric fistulas. Started by Dr Maura Lynch and now continued by Dr Florence Nalubega and Dr Nabukalu.

## ILLUSTRATIONS

In addition to those acknowledged individually in the manual:

- Most of the original illustrations and cover design were drawn by Luan Serfontein.
- Several illustrations were adapted from “Les Fistules Obstetricales” by Maurice Camey with permission through Charles Rochat.
- Brian Hancock was most generous in allowing me to use several of his photographs.

## **PREFACE**

The aim of this manual is to help those who wish to deal with the many problems associated with obstetric fistulas. It is mainly based on the notes I kept as I learnt fistula surgery. However, as fistula surgery is a practical subject, there is no substitute for hands-on training and experience; this applies particularly for the difficult fistulas. I am grateful to the Fistula Foundation for sponsoring the publication of this manual and to GLOWM for printing it. As the manual will be available on-line ([http://www.glowm.com/recommended\\_textbooks](http://www.glowm.com/recommended_textbooks)), I would be grateful for any feedback and suggestions to allow the manual to be updated and improved from time to time.

**Michael Breen**
