

GUIDE TO REPRODUCTION, ADAPTATION AND TRANSLATION OF WHO COPYRIGHT MATERIALS

The Multi-professional Patient Safety Curriculum Guide

© World Health Organization, 2011

The World Health Organization developed the **WHO Multi-professional Patient Safety Curriculum Guide** following a review of the published evidence in the field, and through a process of broad international consultation. This Curriculum Guide is now available to use and study of its implementation is underway in all six WHO regions.

The Multi-professional Patient Safety Curriculum Guide was developed to support the education and training of health-care professionals in patient safety and to encourage the spread of patient safety teaching to those involved in delivering patient care.

The Curriculum Guide is targeted at dentistry, medical midwifery, nursing and pharmacy schools. It contains information for all levels of faculty staff and a comprehensive curriculum covering the essential patient safety principles and concepts. It is also a rich resource for senior decision makers in health-care curricula.

Eleven sets of teaching slides representing topics in patient safety, information notes and promotional materials can be used as resources to support the introduction and teaching of patient safety topics either as stand-alone courses or integrated into existing curricula.

Reproducing and adapting resources from the WHO Multi-professional Patient Safety Curriculum Guide

1) Reproducing the WHO Patient Safety Curriculum Guide for educational and teaching purposes

The WHO Patient Safety Curriculum Guide and its resources including the eleven sets of teaching slides, the information notes and the promotional materials can be reproduced for educational and teaching purposes only by universities or schools. The materials should be used in their entirety without any adaptations or modifications to layout or wording. This includes the WHO emblem as it appears as

an integral part of the materials. Co-use of institutional logo together with the WHO and Patient Safety Programme logos in non-adapted materials is not permitted.

Any other use of the WHO Patient Safety Curriculum Guide requires permission. Requests should be made using the following form:

http://www.who.int/about/licensing/copyright_form/en/index.html

2) Adapting the WHO Patient Safety Curriculum Guide for educational purposes

Institutions and universities are encouraged to reproduce and adapt the learning resources and suggestions from the WHO Patient Safety Curriculum Guide and to tailor suggested students knowledge and performance outcomes according to their own unique needs, context and available resources.

If the WHO Patient Safety Curriculum Guide, or any of the individual chapters/topics, eleven sets of teaching slides, information notes or promotional materials are modified or adapted in any way, the WHO logo should not be used. Instead, in order to acknowledge the original WHO source, the following sentence should be used:

'Based on the WHO Multi-professional Patient Safety Curriculum Guide, URL <http://www.who.int/patientsafety/education/curriculum/en/index.html> , © World Health Organization, 2011. All rights reserved.'

3) Translation

Institutions and universities are encouraged to translate the WHO Patient Safety Curriculum Guide, or any of the individual chapters/topics it contains, the eleven sets of teaching slides, information notes and promotional materials, subject to authorization. For permission to translate the entire WHO Multi-professional Patient Safety Curriculum Guide please apply at:

http://www.who.int/about/licensing/translation_form/en/index.html
